with installed blower and breathing tube covers, followed by fresh water wipe/rinse.

## Application & Limitations

Sanitization solutions noted above may be used on cloth, paper towels, or spraying and wiping/rinse components with water post use. Follow decontamination procedures and dry with a soft cloth.

Do not store or immerse any Sentinel XL™ or XT™ respirator filter, breathing tube, belts, or hoods in sanitization solutions. This may result in permanent damage to the equipment.

Sodium hypochlorite solutions will result in degradation of the breathing tube and could lead to failure of the hose.
